

## EDUCATIONAL TECHNOLOGY STANDARDS & EXPECTATIONS

**Grades 9-12**

## Welcome to Michigan's Educational Technology Standards & Expectations

It is a goal of No Child Left Behind that schools will “Assist every student in crossing the digital divide by ensuring that every student is technologically literate by the time the student finishes the eighth grade, regardless of the student’s race, ethnicity, gender, family income, geographic location, or disability.”

The Grade Level Educational Technology Standards & Expectations for 9–12 are aligned with the International Society for Technology in Education’s (ISTE) National Educational Technology Standards for Students (NETS-S). They are meant to provide teachers with an outline of learning expectations and will be used to drive educational technology literacy assessments for the next several years.

The goal is that these Standards and Expectations will ultimately be integrated into the various other content areas and that a supplementary document will be produced offering examples and suggestions on how they could be incorporated within those areas.

### Technology Literacy

Technology literacy is the ability to responsibly use appropriate technology to communicate, solve problems, and access, manage, integrate, evaluate, and create information to improve learning in all subject areas and to acquire lifelong knowledge and skills in the 21st century. The Standards and Expectations for each grade range are established to designate clearly what students are expected to know by the end of grades two, five, eight, and twelve.

### Distance Learning

The State Board of Education has recommended that all students take an online course or have an online learning experience before graduation. Students must understand that to be successful in an online course, you should:

- be self-motivated and self-disciplined
- be committed to the course—online courses are at least as time-consuming as face-to-face courses
- take responsibility for your own learning and plan to be a self-directed learner
- expect to log on daily for updates, messages, and communication among participants
- anticipate being at the computer for extended amounts of time
- speak up immediately if you are having technical difficulties or are having problems understanding
- be ready to participate in online classroom discussions
- be able to read and follow written directions—at this time, reading is a critical skill in online learning
- be comfortable and competent with instructional technologies, using computers, the Internet, e-mail, office applications, and other applications appropriate to the learning situation
- possess the skills and knowledge needed to locate, differentiate, and evaluate various sources of information, and why, when, and how to use them

## **BASIC OPERATIONS AND CONCEPTS**

*By the end of Grade 12 each student will:*

1. discuss emerging technology resources (e.g., podcasting, webcasting, compressed video delivery, online file sharing, graphing calculators, global positioning software)
2. identify the capabilities and limitations of emerging communication resources
3. understand the importance of both the predictable and unpredictable impacts of technology
4. identify changes in hardware and software systems over time and discuss how these changes might affect the individual personally in his/her role as a lifelong learner
5. understand the purpose, scope, and use of assistive technology
6. understand that access to online learning increases educational and workplace opportunities
7. be provided with the opportunity to learn in a virtual environment as a strategy to build 21st century learning skills
8. understand the relationship between electronic resources, infrastructure, and connectivity
9. routinely apply touch-typing techniques with advanced accuracy, speed, and efficiency
10. assess and solve hardware and software problems by using online help or other user documentation and support
11. identify common graphic, audio, and video file formats (e.g., jpeg, gif, bmp, mpeg, wav)
12. demonstrate how to import/export text, graphics, or audio files
13. proofread and edit a document using an application's spelling and grammar checking functions

## **SOCIAL, ETHICAL, AND HUMAN ISSUES**

*By the end of Grade 12 each student will:*

1. identify legal and ethical issues related to use of information and communication technology
2. analyze current trends in information and communication technology and assess the potential of emerging technologies for ethical and unethical uses
3. discuss possible long-range effects of unethical uses of technology (e.g., virus spreading, file pirating, hacking) on cultures and society
4. discuss the possible consequences and costs of unethical uses of information and computer technology
5. identify ways that individuals can protect their technology systems from unethical or unscrupulous users
6. demonstrate the ethical use of technology as a digital citizen and lifelong learner
7. explain the differences between freeware, shareware, and commercial software
8. adhere to fair use and copyright guidelines
9. create appropriate citations for resources when presenting research findings
10. adhere to the district acceptable use policy as well as state and federal laws
11. explore career opportunities and identify their related technology skill requirements
12. design and implement a personal learning plan that includes technology to support his/her lifelong learning goals

## **TECHNOLOGY PRODUCTIVITY TOOLS**

*By the end of Grade 12 each student will:*

1. complete at least one online credit, or non-credit, course or online learning experience
2. use technology tools for managing and communicating personal information (e.g., finances, contact information, schedules, purchases, correspondence)
3. have access to and utilize assistive technology tools
4. apply advanced software features such as an application's built-in thesaurus, templates, and styles to improve the appearance of word processing documents, spreadsheets, and presentations
5. identify technology tools (e.g., authoring tools or other hardware and software resources) that could be used to create a group project
6. use an online tutorial and discuss the benefits and disadvantages of this method of learning
7. develop a document or file for inclusion into a web site or web page
8. use a variety of applications to plan, create, and edit a multimedia product (e.g., model, webcast, presentation, publication, or other creative work)
9. have the opportunity to participate in real-life experiences associated with technology-related careers

## Educational Technology Standards & Expectations Continued...

### TECHNOLOGY COMMUNICATIONS TOOLS

*By the end of Grade 12 each student will:*

1. identify and describe various telecommunications or online technologies (e.g., desktop conferencing, listservs, blogs, virtual reality)
2. use available technologies (e.g., desktop conferencing, e-mail, groupware, instant-messaging) to communicate with others on a class assignment or project
3. use a variety of media and formats to design, develop, publish, and present products (e.g., presentations, newsletters, web sites) to communicate original ideas to multiple audiences
4. collaborate in content-related projects that integrate a variety of media (e.g., print, audio, video, graphic, simulations, and models) with presentation, word processing, publishing, database, graphics design, or spreadsheet applications
5. plan and implement a collaborative project using telecommunications tools (e.g., groupware, interactive web sites, videoconferencing)

### TECHNOLOGY RESEARCH TOOLS

*By the end of Grade 12 each student will:*

1. compare, evaluate, and select appropriate internet search engines to locate information
2. formulate and use evaluation criteria (authority, accuracy, relevancy, timeliness) for information located on the internet to present research findings
3. determine if online sources are authoritative, valid, reliable, relevant, and comprehensive
4. distinguish between fact, opinion, point of view, and inference
5. evaluate resources for stereotyping, prejudice, and misrepresentation
6. develop a plan to gather information using various research strategies (e.g., interviews, questionnaires, experiments, online surveys)

### TECHNOLOGY PROBLEM-SOLVING AND DECISION-MAKING TOOLS

*By the end of Grade 12 each student will:*

1. use a variety of technology resources (e.g., educational software, simulations, models) for problem solving and independent learning
2. describe the possible integration of two or more information and communication technology tools or resources to collaborate with peers, community members, and field experts
3. formulate a research question or hypothesis, then use appropriate information and communication technology resources to collect relevant information, analyze the findings, and report the results to multiple audiences
